

MIDWEST HOSE MINING INDUSTRY

KEEPING THE INDUSTRY CONNECTED.®

HYDRAULIC

Midwest Hose offers a complete line of hydraulic hose, fittings and adapters and quick couplings. MWH hydraulic products are designed to meet the or exceed the strenuous industry standards. Many of our hoses have the MSHA layline, DIN codes or SAE designations for 1 -wire hoses all the way up to 6 spiral hoses. All the hoses in our program meet or exceed the latest SAE and DIN requirements with 4:1 safety factor. We have in house testing equipment to test all hydraulic hoses that come and go out of our shops. Whether you need JIC, Male Pipe, Split Flange, Metrics or Staple-lok, we can supply what your next project requires.

INDUSTRIAL

Midwest Hose offers a broad line of industrial hoses. We are one of the few hose companies in the world with their own hose plants. We are vertically integrated and manufacture our own industrial hose in the worlds new industrial hose plant. Our engineering team can build virtually any industrial hose you need. Our standard chemical hoses, petroleum hoses, air hoses, material handling hoses and water suction hoses are prebuilt in our centrally located OKC manufacturing facility. We are proud to say that we test all our hoses built in the OKC plant. The testing process includes a serial number and online documentation.

METAL

Midwest Hose has 3 metal hose fabrication facilities around the country. These fab shops can build any size metal hose assembly that you may need for your operations. Metal hoses are found in multiple applications in the mining world. We stock pre-built metal hose assemblies from 1-1/2" x 20ft to 12" x 20ft with fixed x floating flanges for quick turn-around. Custom configurations are readily fabricated by our skilled welders.

LAYFLAT

Midwest Hose is the trusted name in water transfer hoses with hundreds of miles of layflat hose in service. Our hose is proudly made in our plant in Corry Pennsylvania. We also produce our own fittings, reels and deployment systems. We offer custom configurations of hose, hose fittings and reels for both surface mining and underground mining. Our polyurethane hose offer rapid deployment capabilities compared to setting up HDPE pipe underground. Our polyurethan layflat hose can also be used for flexible riser lines in dewatering wells. We produce sizes 2" up to 16". Our lengths can run up to 660ft continuous lengths. Polyurethane offers up to 5 times the resistance of traditional PVC layflat hose.

DUCTING

Our ducting plant located in Oklahoma City, OK is our newest plant. This is made in the USA product. We manufacture all types of wire supported ducting for ventilation, heat, dehumidification, and fume control. Our ducting plant can also produce custom ducting options for clients. We have new generation fabrics used in our ducting that prevent mold and mildew growth. Our core fabric products contain hydrostatic dust repelling technology to help keep the ducting clean.

HYDRAULIC REPAIR

Midwest Hose has two locations that focus on hydraulic pump and motor repair. Our repair shops have a large test bench to validate the repairs. We can work on virtually all makes and brands of hydraulic pumps and motors. We sell all the ancillary parts and pieces to simplify your hydraulic repairs. Let us know if you want to talk to an expert that can help with your hydraulic project today.

QUALITY YOU CAN TRUST, AVAILABILITY YOU CAN COUNT ON.

WHO WE ARE

Midwest Hose is known for providing the best quality, value, and service in the industry. We specialize in meeting, if not surpassing, the needs of our customers. Since our start in 1983, we've been selling industrial and oilfield products such as hose, belts, valves, unions, fittings, and specialty items. We are one of the largest suppliers in the United States and our cycle test machine can demonstrate our quality against other brands. There's no one out there like us: let us prove ourselves.

OUR QUALITY POLICY

Midwest Hose & Specialty, Inc. will meet or exceed the expected requirements of our customers by providing the finest quality products and service. We will strive for continual improvement and meet our quality objectives as we become one of the foremost suppliers of Hose Assemblies.

AVAILABILITY

Most comprehensive product line for a hose distributor - wide range of fittings and full lines of hydraulic, industrial, rotary, and layflat hose. Diversified inventory keeps industries connected.
